CHAIR'S MESSAGE

To the Members of the Friends of The Moncton Hospital Foundation, Inc.:

Goodwill, grit and a great deal of pivoting ensured that the Friends of The Moncton Hospital Foundation successfully navigated the pandemic. Despite the challenges, I am delighted to share that we have recorded the best year in the Foundation's history with $5.88 Million generated. Helping us reach that impressive level of giving, was a $1 Million grateful patient donation to the hospital – marking the Foundation's largest outright gift.

PATRICIA ARMOUR, CHAIR
Friends of The Moncton Hospital Foundation

One thing this pandemic has reminded us of is the critical importance of local healthcare. Our donors didn't stop giving, and for that we are deeply appreciative. Together, we've helped thousands of patients receive lifesaving care, the latest treatment options, powered by sophisticated technology and backed up by the very best medical expertise in improved facilities.

Back in March, your Foundation established the Covid-19 Care Fund to respond to emerging staff and patient needs at The Moncton Hospital (TMH) stemming from the pandemic. The response was phenomenal raising over close to $94,000 for a Chest Compression System in the Emergency Department, phlebotomy chairs for the clinic at the coliseum, and iPads to allow patients to communicate with their families. Cost of TV service for patients who couldn't afford to pay was also covered. In addition, a contribution was made towards our staff BBQ - a much needed moral booster. Covid-19 placed many challenges on our fundraisers including the cancellation of our Annual Swing Into Spring Gala and Hit It Fore Health Golf Tournament. We switched to online and virtual events and were creative in many other ways. One example is the success of the NB Doctors Cycling Against Cancer Ride which was changed to a solo ride and raised more than $100,000, the most ever in our 6-year history. With Ride funds, the Foundation purchased a $234,000 digital slide scanner to help pathologists detect cancer.

We wrapped up the #Be the Difference 2019-2020 Annual Campaign to support sick kids and their families by funding the creation of a new Complex Care Suite in the Pediatric Department and for the purchase of an advanced ultrasound machine (first in New Brunswick) and probe that displays outstanding 3-D images of the kidneys on a high-resolution monitor during laparoscopic or minimally invasive surgery. Construction of the Complex Care Suite will begin this summer anticipating a Fall completion. You may have noticed the new awning at the Dr. Sheldon H. Rubin Oncology Clinic – a welcome addition to protect cancer patients from the outside elements when arriving and leaving from their appointments. The entire project cost $137,500. $75,000 came from the estate of Gilbert Bowness with the remainder of funds from NB Doctors Cycling Against Cancer fundraising.

Construction started on a new family-centred Maternity and Newborn Unit. The new building on MacBeath Avenue, will include the Labour and Birthing Unit, Neonatal Intensive Care Unit and the Maternal Fetal Medicine Clinic. Expected date of occupancy is early 2023. This has all been made possible with funds from the Extraordinary Care Campaign and the provincial government. The second project, a new Coronary Care Unit and a Coronary/Step-Down Unit, is tentatively scheduled to start in April 2022 with expected occupancy in March 2025.

Our loyal donors were asked to give to the #SoManyReasonstoGive 2020-2021 Annual Campaign to advance cancer care at TMH. These funds will provide a rooftop sunroom and garden space for cancer patients on the oncology inpatient unit. This much needed area will foster wellness, relaxation and healing in a comforting environment. The pandemic greatly reinforced and highlighted the need for this project. The Foundation will also be investing in a sophisticated endobronchial ultrasound commonly known as an EBUS. This highly effective, minimally invasive diagnostic tool is the method of choice for respirologists and thoracic surgeons. The EBUS can accurately diagnose pulmonary diseases, principally lung. Right now, for some patients, there is a 2 to 3 hour surgery, followed by 5 to 6 days in hospital and then an 8 to12 week recovery period. This modern device allows patients to get back into their daily routines and activities, and permits them to spend more time doing what they personally enjoy, much sooner than ever before! These projects will give us all peace of mind knowing that our friends, family and neighbours dealing with cancer, can receive world class care here at home.

The show must go on and go on it did! Another pandemic success story is the 10th Annual Q103 and New Country 96.9 Radiothon held January 29 which generated $75,000 - the most in the event's history - smashing the goal of $50,000! For the third year, Atlantic Lottery joined as our Corporate Partner with a $25,000 lead gift. Although this year's milestone Radiothon was certainly challenging due to Covid-19 and the many operational adaptations that had to be made during the 12-hour live broadcast – there were countless memorable moments to celebrate.

With great pleasure, the Foundation honoured virtually donors who have contributed a total of $10,000 or more at our 27th Annual Donor Dinner, held on December 16. During the evening, 36 individuals, community groups, and businesses were recognized for having reached new milestones in cumulative giving. Our guest speaker was Infectious Disease Specialist Dr. Gordon Dow. The Foundation had a very successful year in planned giving. A number of our donors contributed over $1.48 Million through bequests, gifts of listed securities, and life insurance premium payments.

In 2020-2021, Friends' endowments continued to grow. A notable $668,881 was endowed with six new named endowments created, including: MRDIB and Cullen Family Endowment Fund, Thomas and Ruth Barnes Memorial Fund, Carol and George Proctor Endowment Fund, Linda Saunders Endowment Fund, Bernard Sloan Endowment Fund and the Lynn Whalen Memorial Endowment Fund. Close to $272,000 will be disbursed from our endowments to various funds in 2021.

We can celebrate the fact that the Foundation has had a number of endowments created to provide educational funding for hospital staff. This year, we were able to offer over $6,000 in grants to 11 staff members. This is much lower than previous years due to Covid-19 which hindered the staff's ability to attend conferences, workshops and other educational opportunities.

We bid farewell to board members David Savoie, Dr. Paul Goobie, Robert Hiscock, Kirk Muise and Jacques Pinet. These community minded individuals were instrumental in moving the Foundation's mission forward. We embraced new directors Carol Chapman, Shane Esson, Steve McLaughlin and Dr. Serge Melanson. Temporary Board appointees Tracy Clinch, Celine Robichaud-Trifts, Wayne McDonald and Mike Jenkins were formally appointed at the 2021 AGM. I would be remiss if I didn't acknowledge the support and dedication of our Board of Directors and the Friends Foundation staff who came together in extraordinary ways in very challenging circumstances.

We said goodbye to Linda Saunders, Friends President and CEO, who retired after 31 years at the helm. A virtual retirement celebration was held to recognize her exceptional leadership and for all she accomplished during her tenure. We were delighted that The Linda Saunders Endowment Fund was created in her honour. We welcomed her successor Greg King who took over in September. We can say with confidence that we are in great hands as Greg leads the Foundation into its bright future.

It is imperative to highlight the resiliency of our physicians, nurses, and all those in supporting roles that have been tested to the limit. But through it all, they have demonstrated time and again their commitment to delivering the highest quality and safest patient care possible.

Our donors invest in what matters most - our health, the health of our loved ones and the health of our community. Thank you just doesn't seem to be enough to express our utmost gratitude to you - our donors - for your continued support during the pandemic. It is a privilege to have such generous supporters in creating a healthier tomorrow.

Patricia S Armour

FRIENDS TEAM

Our Friends Foundation Team – fundraising rock stars – are to be commended for their compassion for donors and transforming healthcare. Their behind the scenes work continues to make the Foundation thrive. They are immensely proud of the work they do to make The Moncton Hospital better for patients and their families.

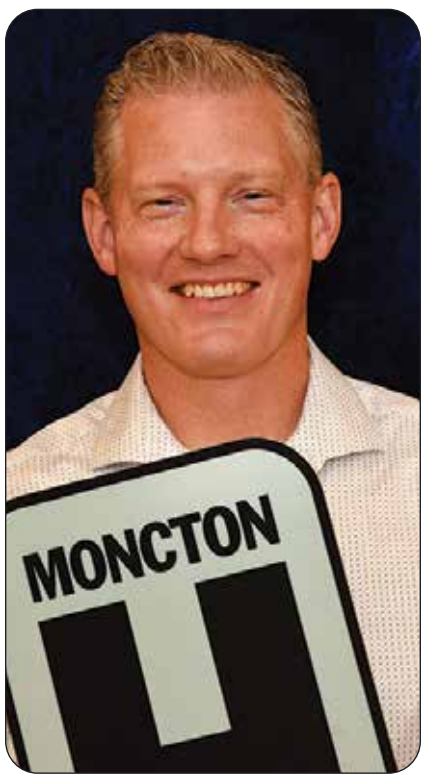
FRIENDS FOUNDATION ANNOUNCED NEW PRESIDENT & CEO

Greg King has been appointed as the new President & Chief Executive Officer of the Friends of The Moncton Hospital Foundation.

Foundation Board Chair Pat Armour says King, who assumed the role at the end of September, was the successful candidate after a national executive search over several months supported by KBRS - Knightsbridge Robertson Surrette. "Greg King has strong leadership experience in the public, private and non-profit sectors and we are delighted to welcome him to take on the leadership of the Friends Foundation," remarks Armour.

King has his Master of Business Administration (MBA) and is a Chartered Professional Accountant (CPA). His last post was with Atlantic Lottery as Vice President of Finance and Corporate Services. King gained fundraising experience in previous roles serving as Vice President and Chief Operating Officer with the Centre for Addiction and Mental Health Foundation in Toronto, as well as the Chief Financial Officer with the QEII Health Sciences Centre Foundation in Halifax.

"I am honoured to be continuing the great work of Linda Saunders and her team. Now more than ever, the hospital is vital to our community and needs our collective support. I am very much looking forward to collaborating with our donors, staff, Board and other volunteers to improve the care of patients and their families," says Greg King. King has deep roots in Atlantic Canada. He has spent most of his life in Halifax and has been living in Moncton for eight years with his wife Carolyn and their three children. The CEO search was part of a succession process initiated by the planned retirement of the founding President & CEO of the Friends of The Moncton Hospital Foundation, Linda Saunders, after 31 years of outstanding leadership.



Greg King
President & CEO

OUR MISSION

The Friends of The Moncton Hospital Foundation raises funds to help The Moncton Hospital deliver exceptional healthcare and promote wellness to meet the needs of our communities.

OUR VISION

Transforming health and changing lives together.

DONOR DOLLARS AT WORK

CONSTRUCTION UNDERWAY FOR NEW MATERNITY AND NEWBORN UNIT

Construction has started on a new family-centred Maternity and Newborn Unit. The new building on MacBeath Avenue, will include the Labour and Birthing Unit, Neonatal Intensive Care Unit and the Maternal Fetal Medicine Clinic. Expected date of occupancy is early 2023. This has all been made possible with funds from the Extraordinary Care Campaign and the provincial government. The second project, another new building containing a new Coronary Care Unit and a Coronary/Step-Down Unit, is tentatively scheduled to start in April 2022 with expected occupancy in March 2025.

Advanced Digital Slide Scanner to Help Diagnose Cancer Purchased with NB Doctors Cycling Against Cancer Funds

The Moncton Hospital is the First Hospital Laboratory in New Brunswick to Acquire this Ground-Breaking Technology

Cancer care will be a little less complicated for patients at Horizon's The Moncton Hospital (TMH) thanks to a record setting NB Doctors Cycling Against Cancer Ride. The $100,000 raised in the solo ride in 2020, which was adapted due to Covid-19, went towards the purchase of an advanced digital slide scanner to assist Pathologists in detecting cancer.

This device, which has a price tag of $234,000, will enhance turnaround time for test results, allowing patients to receive diagnosis and treatment options more quickly. Right now, the patient samples requiring consultation are sent out of province via courier for review by expert Pathologists. This can mean delays impacting patient diagnoses and treatment.

Every pathology diagnosis, from cancer to Crohn's disease, is made by a Pathologist looking at patient samples. For many complex cases, we rely on the expertise of Pathologists outside of New Brunswick in order to make the correct diagnosis. A slide scanner allows for a high quality digital picture to be taken which can be shared with these experts instantly.

A faster turn-around time is critical to expedite a patient's treatment, improve patient care and potentially save lives. TMH sends out about 300 consultations per year.

The modern technology is entirely funded from money raised through the Friends of The Moncton Hospital Foundation's NB Doctors Cycling Against Cancer Ride. This event is a physician-led bicycle trek supporting the Sheldon H. Rubin Oncology Clinic and inpatient unit at The Moncton Hospital.

CANCER PATIENTS PROTECTED FROM THE ELEMENTS

Construction has been completed on a beautiful new outdoor awning for the Dr. Sheldon H. Rubin Oncology Clinic. This is a welcome and important addition to the building to protect cancer patients from the outside elements.

The entire venture cost was $137,500. Special thanks to the estate of Gilbert Bowness for contributing $75,000 to the Foundation towards this venture. The remainder of the funds came from the NB Doctors Cycling Against Cancer fundraising. Jennifer Rogers, Nurse Manager of the clinic, is very appreciative, "The new canopy will provide much needed coverage from the weather for our patients when they are dropped off or picked up at the front door.

The canopy will decrease the amount of snow and ice that often accumulates outside the door in the winter and keep our patients dry in the summer. It is also aesthetically pleasing and ties in nicely with the design of the building. We are all very proud that the NB Doctors Cycling group and their donors to help us make this a reality."

NEW ADVANCED ULTRASOUND AT TMH

First in New Brunswick

Dr. Troy Sitland and OR Urology Tech, Fran Ginson.

Thanks to hundreds of caring donors, a new ultrasound and probes that displays outstanding 3-D images of the kidneys on a high-resolution monitor during laparoscopic or minimally invasive surgery has made its new home in the Operating Room. Dr. Troy Sitland, Urologist, says this technology allows him to safely and very quickly identify the exact location of the tumour in the kidney. Although not suitable for all patients, the new ultrasound equipment is expected to be used in at least one third of the kidney cancer cases. The Moncton Hospital receives a number of referrals from throughout the province each year because of its well-established Advanced Kidney Cancer Laparoscopic Program. The equipment will also be useful for liver and pancreas surgery.

ANNUAL CAMPAIGN ADVANCES CANCER CARE AND COMFORT AT TMH

Giving patients access to modern diagnosis of lung cancer leading to quicker treatments with improved technology and creating a sunroom and garden space to inspire hope and healing, is the focus of the Friends of The Moncton Hospital Foundation's Annual Campaign.

A TOOL TO DIAGNOSE AND STAGE LUNG CANCER

When you consider that lung cancer is the deadliest cancer and the most commonly diagnosed cancer in Canada, it is critical that the medical team at The Moncton Hospital have the most modern device for diagnosis. This Endobronchial Ultrasound System (EBUS) allows patients to have their diagnostic procedure in a clinical setting with procedural sedation, eliminating the need for the operating room and a general anaesthetic. TMH was the first centre to offer this service in the Maritimes with the current donor funded EBUS purchased more than ten years ago. That technology is now beyond its life expectancy and must be replaced. The EBUS is a highly

effective, minimally invasive diagnostic tool and the method of choice for respirologists and thoracic surgeons to accurately diagnose pulmonary diseases. In some cases, there currently is a 2-3 hour surgery, followed by 5-6 days in hospital and an 8-12 week recovery period. This modern EBUS allows patients to get back into their daily routines and activities and permits them to spend more time doing what they personally enjoy, much sooner than ever before. "These projects will give us peace of mind knowing that our friends, family and neighbours dealing with cancer, can receive world class care here at home," says Friends President and CEO, Greg King.

ROOFTOP SUNROOM AND GARDEN SPACE

An outdoor area off the 30-bed oncology inpatient unit on the fourth floor of Horizon's The Moncton Hospital (TMH) will be transformed into a bright, hope inspiring four-season sunroom and garden space for patients to relax and heal. This much needed area will foster wellness in a homelike environment for patients who are yearning for some peace, quiet and time to reflect outside of their hospital room. This is not currently possible. Oncology Unit Nurse Manager, Peggy Carter Emery, says a tranquil space, which will provide a significant improvement to a patient's physical and psychological wellbeing, is needed now more than ever. "The pandemic greatly reinforced and highlighted the need for this project," says Carter Emery.

GRATEFUL PATIENT MAKES $1 MILLION DONATION TO HOSPITAL

This Marks Foundation's Largest Outright Gift

Ross MacNeill doesn't want the spotlight to shine on him and would prefer not to talk about his contributions to the Friends of The Moncton Hospital. MacNeill, who turned 90 on March 1, would rather praise the medical staff at the hospital. "They are all tops in my books," said MacNeill, who has been treated for heart issues and a stroke in recent years and a severe bowel blockage last fall. "We're fortunate to have these people in Moncton," he added. "They are very professional and they know how to help people. I will always be grateful for what they have done for me."

MacNeill's gratitude was shown when he donated just over $1 million in listed securities he and his wife Patsy had accumulated over many years. "This has nothing to do with me," MacNeill said. "I figure if it helps their cause, it's something I want to do. I've heard a lot about the good work they have done and I hope this helps them out."

MacNeill grew up in Amherst, where he delivered newspapers as a schoolboy. He made 210 deliveries every week and earned a penny for each. He looked to make money any way he could – from shooting pool to working as a caddy at the golf club. MacNeill also worked in the oil fields before spending a year at Mount Allison University in Sackville. Following that, MacNeill landed a job with Household Finance and travelled throughout Atlantic Canada to collect on overdue loans. "I learned a lot," he noted. "I never understood people who borrowed money and never intended on paying it back. "In my life, I never spent money I didn't have. That's how I was able to save as much as I did. There's only one secret – spend less than you make." MacNeill wound up moving to Moncton in 1962 and established his own bill collecting business – Credit-Aid Ltd. It remains in name only today, but is not active. He and his wife "Pat", a Moncton native, have been married 62 years and they have two daughters – one in Scoudouc and one in Surrey, B.C. "I worked hard every day and it was probably 11 hours a day and seven days a week, but I was able to make a good life for myself and my family," MacNeill said. "Through the hard work, I was able to save money. We only spent about 25 per cent of what I made on the job and the rest we saved."

MacNeill was inspired by the generosity shown by American financial giants Warren Buffett and Bill Gates, who are known for donating billions of dollars to various charities. MacNeill said Doctors Serge Melanson and Bharathi Raja Chinnathurai have also inspired him. "These are two amazing doctors who made an impact on my life. I hope I can help them and the other doctors at The Moncton Hospital make a difference in the lives of others like they made a difference in my life."

Ross MacNeill

COVID-19 CARE FUND FOR TMH

The Foundation launched the Covid-19 Care Fund for TMH on March 31, 2020 to respond to emerging staff and patient needs from the pandemic. The response was phenomenal with over $94,000 generated.

$15,000 was spent on a Chest Compression System for the Emergency Department. Two phlebotomy chairs with a pricetag of $10,132 were purchased for the clinic at the Moncton Coliseum. Seven iPads with stands were acquired to allow patients to communicate with their families. The Foundation was pleased to support the staff BBQ with a $1,000 contribution.

The fund also covers the cost of TV service to patients who can't afford to pay.

MONCTON H
MAKE YOUR MARK ON THE FUTURE
LEAVE A LEGACY

After you have remembered your loved ones, please consider including the **Friends of The Moncton Hospital Foundation Inc.** in your **Will**. You can improve the lives of family, friends and your community while creating a legacy that will last forever.

You can do it today.
- Costs you nothing during your lifetime
- Preserves your savings and cash flow
- Can be changed or revoked as needed
- Allows you to be far more generous than you ever thought possible
- Easy to arrange. A simple paragraph added to your **Will** is all it takes.

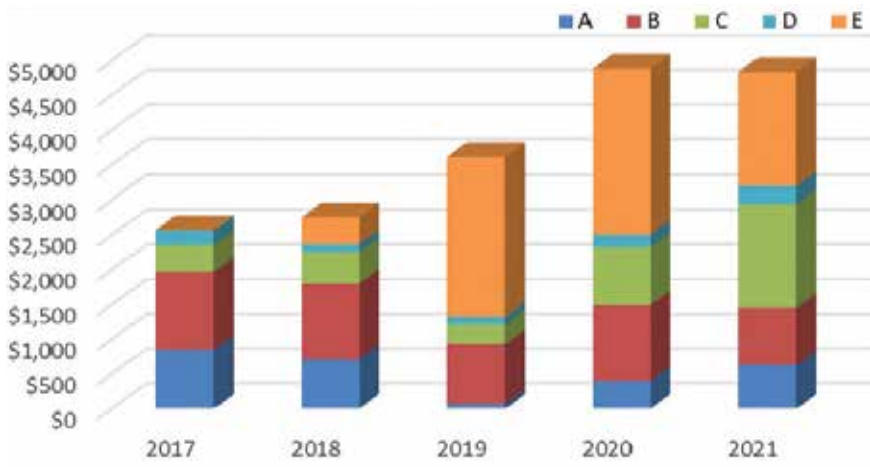
ACCOUNTABILITY

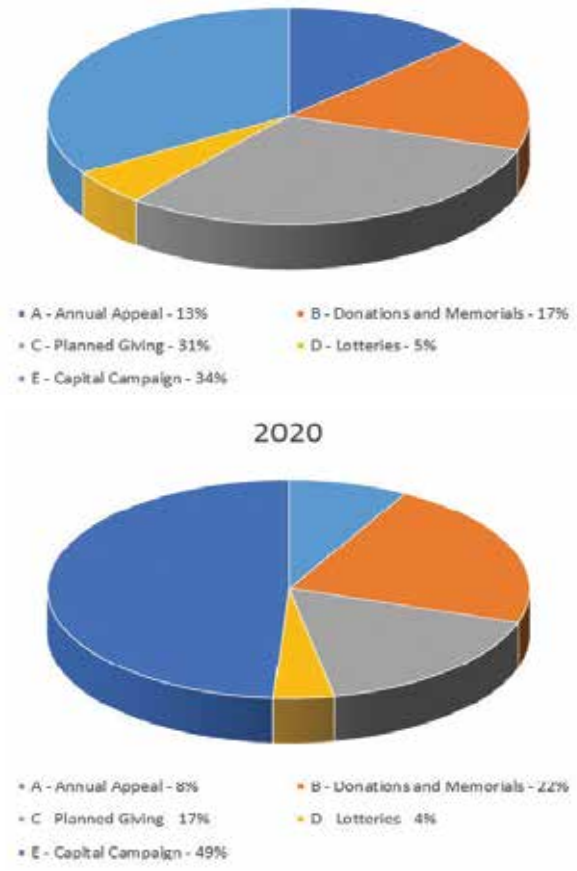
Focused on ongoing and future excellence, the Friends of The Moncton Hospital Foundation raises the additional funds – over and above the essential health care provided by government – that ensure the most advanced and exceptional health care possible. The Foundation is committed to leadership in transparency and accountability.

ANALYSIS OF REVENUE FROM FUND RAISING



1. Annual Appeal: A modified Annual Appeal was held in 2020/2021 as many donors were still committed to the Capital Campaign through their multi-year pledges.
2. Donations and Memorials: This category was down approximately 25% over last year due primarily to pandemic related impacts.
3. Planned Giving: The Foundation achieved very strong results in planned giving due to a large, outright gift of securities of approximately $1M.
4. Lotteries: The NB Hospital Home Lottery sold out early in its second year. The results of the partnership with the Saint John Regional Hospital Foundation and the CHU Dumont Hospital Foundation grew significantly over last year.
5. Capital Campaign: Pledges continue to be received from the $10.1M Extraordinary Care Capital Campaign, contributing significantly in 2020/2021. Revenue can be expected to decline year over year as pledge commitments are realized.

ANALYSIS: TOTAL REVENUE (Less Investment Income)



The major categories of revenue as a percentage of total revenue (less investment income) for the years ended March 31, 2021 and March 31, 2020 are displayed above.

NAMED ENDOWMENTS FOR THE MONCTON HOSPITAL:

- The Vaughn and Ruth Adair Endowment Fund

THANK YOU TO ALL OF OUR VALUED DONORS

Thank you for playing an important role in advancing and strengthening health care excellence at The Moncton Hospital. Each and every donation is appreciated as it is invested in sophisticated technologies and renovated spaces to make a positive impact for patients, their families, health care staff and the future of medicine. We are honoured to recognize our generous donors. All donations recognized in the Friends for Life donor recognition program will be cumulative over the lifetime of the donor; beginning January 1, 1990. The Foundation would also like to thank those who made anonymous gifts to the hospital.

DONOR LEVELS
