

PROJECT CANCER SUPPORT

Help us renovate Bannon House

Addressing the unique non-medical needs of those living with cancer.

YOUR GIFT CHANGES LIVES

Welcome to the future site of Bannon House. Your gift will allow us to renovate this home into a safe and warm environment for those participating in our cancer support programs.

A cancer diagnosis comes with many questions, challenges, and worries. Where you turn to for support shouldn't be one of them.

Imagine a dedicated haven where a range of specialized complimentary programs are offered to help those living with cancer. **With your support, this dream will become a reality in 2025.**

Recently, the Friends Foundation was gifted a home on MacBeath Avenue named Bannon House in honour of our generous donor.

Once transformed, this space will be a unique resource hub for those living with cancer; to gather, lean on peers for support, find strength, connect and forge relationships all while acquiring vital information and skills to help those coping with this disease.

Your donation will help bring Project Cancer Support to the next level.

Renovations to Bannon House are expected to begin late fall with the anticipated completion in spring 2025. We look forward to providing a hope-inspiring space to accommodate various evidence-based programs which will be facilitated by a full time on-site manager.

The medical community treats the patient while our support programs treat the person. Programs will be offered at no charge and without referral, to anyone, with any type of cancer, at any stage in their healing journey.

We ask for your help in raising \$1 Million to renovate Bannon House, so that no one has to face cancer alone.

THE FOUNDATION'S GOAL IS TO RAISE \$1 MILLION
